

RVJ

ROBERT V. JENSEN, INC.

Fueling Progress, Driving Change with Renewable Diesel.

RV Jensen is your trusted partner in the journey toward a sustainable future. As a leader in fuel distribution, we are dedicated to providing premium fuel solutions that enable businesses across industries, including agriculture, construction, and any type of diesel fleet, to embrace cleaner energy and make a positive impact on the environment. With our expertise and commitment to sustainability, we offer renewable diesel as a forward-thinking solution that fuels progress and drives change.

Renewable diesel is a next-generation, low-carbon fuel that offers numerous advantages over traditional diesel fuel. It is derived from renewable feedstocks with low carbon intensity, making it a more environmentally friendly alternative. Unlike biodiesel, renewable diesel is an engineered molecule with controlled properties, ensuring optimal combustion and higher performance in diesel engines. It offers a simple switch for businesses with diesel fleets, as it is fully compatible with existing diesel engines and requires no modifications.

Renewable Diesel Benefits

Lower Carbon Footprint

Reduce carbon emissions and lower your business's environmental footprint with the use of renewable diesel. Renewable diesel and biodiesel may seem similar, but they are distinct. Renewable diesel is a pure hydrocarbon fuel akin to fossil diesel, it is sourced sustainably from 100% renewable raw materials.

Simple Switch

Seamlessly transition to renewable diesel, a fully compatible and regulated fuel, ensuring easy compliance with environmental regulations. Partner with RV Jensen to access sustainable fuel options that support a greener future and demonstrate your commitment to sustainability.

High Performance

Experience enhanced engine performance and power with renewable diesel, provided by RV Jensen's expertise in fuel distribution. Most heavy vehicle manufacturers, such as Cummins, Detroit Diesel, Caterpillar, Volvo Trucks, Paccar, Mack, John Deere, & others have approved the use of neat renewable diesel in their engines.

More Efficient Engine

Renewable diesel, boasting a significantly higher cetane rating compared to CARB diesel or biodiesel, takes performance to the next level. Its premium quality empowers engines to burn fuel more efficiently than regular diesel, delivering remarkable performance enhancements.

Rely on RV Jensen's longstanding reputation and expertise in fuel distribution to provide you with high-quality renewable diesel and exceptional customer service.

From Central Valley to the Central Coast

As your one-stop, independent petroleum and lubricants supplier, our employees are dedicated to providing a full range of products throughout California, including Fresno, Madera, Kings, Tulare, Kern, Stanislaus, Monterey, Merced, Mariposa, and Santa Barbara counties.
